Unique T-shirt made by Hanko shop!
Why was **HANKO KIAN** born?

The key point of HANKO is the design of letters. This design is created by searching lines by hand to find the best balance between the letters through trial and error. The design is characterized by its pliableness, like a dancer's pose, and its imposing design. At HANKO KIAN, we tried designing T-shirts with the hope that more people would get to know and be familiar with the HANKO character design. During hardship, anyone tend to lose their mind and become anxious. Even at such a difficult time, I believe that the universal teachings of Zen could be an encouragement and a salvation, so I decide to use the words of Zen as a stamp.
I hope that the Hanko culture and the words of Zen, which the Japanese have carefully cultivated since ancient times, will touch the hearts of many people in a new form.
